Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 July 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6, 7, 10-13, 15, 16, 18, 19, 21, 22, and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Neil et al. (US Pat. No. 6,306,172) in view of Keller (US Pub. No. 2004/0186584). O'Neil discloses the following of claims 1, 15, 16: a tibia base plate (78) comprising an upper surface, a lower surface and an outer perimeter side surface (see Figures 5-6A) extending between said upper surface and said lower surface of said tibia base plate; an insert (66) comprising an upper surface (67), a lower surface and an outer perimeter side surface extending between said upper surface and said lower surface of said insert (see Figures 5-6A); and a configuration that allows rotation and a pin that when inserted prevents rotation (col. 5, lines 21-35). However, regarding claims 1, 7, 10, 15, 21, 24, O'Neil does not disclose the pin being located in outer perimeter side surface. Keller discloses a pin in this location in paragraph 0007 and claim 6 for the purpose of allowing easier instrument accessibility to the pin's location. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to place the pin in the outer perimeter side surface in order to allow an instrument to more easily access the pin.

O'Neil et al. discloses claims 2 and 18 in col. 1, lines 16-21.

O'Neil et al. discloses claims 3 and 19 in col. 1, lines 31-34.

Art Unit: 3774

O'Neil et al. discloses claims 6 and 22 in col. 5, lines 30-35.

O'Neil et al. discloses claims 11 and 25 as shown in Figure 5-6A.

O'Neil et al. discloses claims 12 and 26 in element 74.

O'Neil et al. discloses claims 13 and 27 in element 72.

Claims 14 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Neil et al. in view of Keller in further view of Hurlburt (US Pat. No. 5,658,344). O'Neil et al. and Keller disclose the invention substantially as claimed, however, they do not disclose a pin made of metal. Hurlburt teaches a pin made of metal in col. 6, lines 27-39 for the purpose of utilizing the material's strength. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the pin of metal in order to utilize the material's strength.

Response to Arguments

Applicant's arguments with respect to claims 1-3, 6, 7, 10-16, 18, 19, 21, 22, and 24-28 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3774

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
